Professional Summary

Full-stack developer with hands-on experience building and launching SaaS products using **Next.js, React, TypeScript, Firebase, Node.js, and MongoDB**. Recently launched **GymPro, securing its first 2 paying gym customers**, and engineered Turfmate, a concurrency-safe booking platform preparing for market launch. Skilled in multi-tenant authorization, REST APIs, data integrity, automated testing, and cloud deployment.

Experience

Independent Full-Stack Developer Jun 2026 – Present

Self-Initiated SaaS Products | GymPro & Turfmate

- Built and launched **GymPro** (Jun–Aug 2026), securing its first **2 paying gym customers**; manage support, enhancements, and reliability.
- Developing **Turfmate** (Sep 2026–Present) for market launch, owning booking architecture, backend security, testing, and deployment.

Frontend Developer Intern Feb 2026 – May 2026

Springer Capital

- **Selected for a production product redesign based on internship performance**; translated Figma specifications into responsive React and Next.js interfaces.
- Developed **Advisor, Operations, and Compliance dashboards** using TypeScript, reusable React/Tailwind components, and interactive Recharts visualizations.
- Delivered production UI improvements through Git feature branches, pull requests, code reviews, and collaboration with engineers.

Projects

GymPro – Multi-Tenant Gym Management SaaS | *Next.js, TypeScript, Firebase* Live App

- Architected **tenant-isolated access** with Firebase Authentication, Firestore Security Rules, and Cloud Functions to protect member and financial data across gyms.
- Built **server-authoritative workflows** for memberships, renewals, attendance, payments, receipts, and reporting, restricting sensitive financial writes to trusted backend operations.
- Implemented Meta WhatsApp Embedded Signup connection flows and an authenticated, connector-ready biometric attendance gateway; validated critical paths with unit, integration, and emulator tests.

Turfmate – Concurrency-Safe Booking SaaS | *Next.js, TypeScript, Firebase* Live App

- Built a **multi-owner booking system** with public booking links, configurable operating hours, time-based pricing, and manual UPI payment verification.
- Engineered **Firestore transaction-backed reservations** with conflict checks and idempotent retries to prevent double bookings during concurrent requests.
- Enforced owner-scoped authorization and server-side validation; tested simultaneous bookings, duplicate requests, and conflict handling before launch.

Forever – Clothing E-Commerce Platform | *MongoDB, Express, React, Node.js* Live App

- Developed a **MERN storefront and admin dashboard** with Express REST APIs for JWT authentication, products, carts, and order management.
- Integrated Cloudinary media uploads and Stripe/Razorpay payment workflows; deployed storefront, admin, and backend as separate Vercel projects.

Technical Skills

Languages: TypeScript, JavaScript (ES6+), HTML5, CSS3
Frontend: React.js, Next.js (App Router), TanStack Query, Tailwind CSS, Recharts
Backend & APIs: Node.js, Express.js, REST APIs, Firebase Cloud Functions, Zod, JWT
Databases & Cloud: Firestore, MongoDB, Firebase Auth, Security Rules, Firebase Storage, Vercel
Testing & Tools: Playwright, Firebase Emulator Suite, Git, GitHub, GitHub Actions

Education

JVM Mehta College, Airoli

Bachelor of Science in Computer Science (CGPA: 8.21) *2022 – 2025*
