Jun 2020 — May 2022

SSC, Dnyanprasarini School, Kalwa 86.80%

Jun 2019 — Jun 2020

PROJECTS

Employee Management System

Developed a complete full-stack Employee Management System using **React**, **Node.js**, **Express**, and **MySQL**. Built modules for employee registration, category handling, profile updates, and fully secured CRUD operations with form validation and image upload support.

Implemented JWT-based authentication, protected APIs, password hashing, session handling, and role-based access for admin operations. Designed a clean, responsive dashboard showing employees, categories, and live updates, enabling smooth data flow and easy management of records.

Tomato - Food delivery website

Created a fully responsive modern food-delivery frontend using **React** and **JavaScript**, featuring dynamic menu display, image-based category filtering, cart management, and reusable UI components for consistency and maintainability.

Implemented React Router for smooth page navigation, state-based UI updates using built-in React hooks, and clean component structure for easier scalability. Designed the layout with a focus on user experience, fast loading, and a visually appealing interface similar to real-world food delivery platforms.
