SUMMARY

Frontend Developer with experience building scalable, production-ready web applications using Next.js, React, and TypeScript. Proven ability to develop data-driven dashboards, implement pixel-perfect UI from Figma, and contribute effectively to live production systems using modern Git workflows.

EXPERIENCE

Frontend Developer Intern

Feb 2026 – May 2026

Springer Capital

- Engineered analytics dashboards (Advisor, Operations, Compliance) using Next.js, React, and Tailwind CSS
- Reimplemented production UI based on Figma designs with pixel-perfect accuracy and full responsiveness across devices
- Developed reusable and scalable component architecture, reducing code duplication and improving maintainability across multiple dashboard modules
- Implemented interactive data visualizations (Line, Bar, Pie) using Recharts for enhanced data insights
- Converted 10+ static HTML pages into modular React + TypeScript components
- Worked in a live production environment following Git workflows (feature branches, pull requests)
- Selected to contribute to live product redesign by reimplementing UI according to updated Figma designs with pixel-perfect precision and full responsiveness

PROJECTS

Money Manager – Finance Dashboard | *Next.js, TypeScript, Firebase, Tailwind CSS*

[Link](#)

- Engineered a full-stack finance dashboard with authentication, real-time data handling, and a fully responsive UI, simulating real-world financial system workflows
- Built complete transaction system (add/edit/delete, filtering, categorization) managing 100+ records efficiently
- Implemented analytics features including income vs expense insights, savings rate, and interactive charts using Recharts
- Integrated Firebase for authentication and database with secure data handling and protected routes
- Added advanced features like budget tracking, financial goals, Excel export, and multi-currency support

Zentry – Animated Gaming Website | *React.js, Tailwind CSS, GSAP*

[Link](#)

- Developed an interactive gaming website with modern UI/UX using React and Tailwind CSS
- Implemented advanced scroll-based animations and transitions using GSAP
- Designed reusable component architecture for scalable and maintainable frontend development
- Optimized performance to ensure smooth experience across devices and browsers

Tomato – Food Delivery Website | *React.js, JavaScript, CSS*

[Link](#)

- Built a responsive food delivery frontend inspired by real-world platforms
- Developed dynamic menu rendering and category-based filtering using React components
- Implemented client-side cart functionality for item selection and quantity management
- Utilized React hooks for efficient state management and improved reusability

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript

Frontend: React.js, Next.js, HTML5, CSS3, Recharts

Styling & UI: Tailwind CSS, Bootstrap, Responsive Design

Animations: GSAP, Framer Motion

Backend & APIs: REST APIs, Firebase

Tools: Git, GitHub, Vercel, Cursor, Copilot

EDUCATION

JVM Mehta College, Airoli

Bachelor of Science in Computer Science (CGPA: 8.21)

2022 – 2025
